

PROFITABILITY

RESPONSIBILITY

CWG recognizes the opportunity for our customers to get the most value out of used or outdated wireless devices. We do this by promoting the recycling, refurbishing, and reusing of wireless devices and their parts in an environmentally sound manner. By doing this we create revenue for your business and a sustainable environment for generations to come.

cwg.com | Visit us at CES booth 12007 in Central Hall.

Repurposing with a purpose.

CWG believes in creating a sustainable environment. To that end, we have printed this insert on paper that is a member of the Domtar EarthChoice® family of products. It is FSC certified, SFI Fiber Sourcing certified, endorsed by the Rainforest Alliance, and features 10% post-consumer recycled content and certified fiber.
